## Stonefort Singapore

Stonefort provides company formation and administration services to private individuals, corporates and institutions.

Stonefort opened its Singapore office in 2016 and our presence has been evolving since as we respond to a combination of the needs of clients for whom Singapore's extensive network of tax treaties are attractive, and as a base from which to serve the dynamic corporate sector in the Asia Pacific region.

Having a presence in Singapore allows us to support clients for whom Singapore's extensive range of double taxation avoidance treaties are relevant. It also complements and provides choice around similar treaty driven services available through Stonefort's office in Dubai.

More broadly, as Asia's third largest financial centre, Singapore possesses the comprehensive financial and ancillary services infrastructure necessary to support businesses seeking to either locate in the city or use Singapore as their gateway to India, China and the surrounding fast growing South East Asian economies. From our office in Singapore, Stonefort focuses on providing corporate services including:

- Company formation and administration (Singapore and offshore)
- Concierge support
- Investment holding companies
- Real estate investment structures
- Blockchain, ICO and Digital Currency Solutions

Singapore ranks highly against all matrices applied in assessing international financial centres and is generally to be found in the top 5 globally, typically ranking after London, New York and Hong Kong. Widely seen as being 'onshore', its strategic location, progressive pro-business approach, wide-ranging tax treaties, well developed financial sector and highly skilled work force combine to make the city very attractive to private clients, corporates and institutions.
